

Burnt-Out Spots

Method Of Cultivating Bad Spots On Prairie Land

In certain sections of the prairie provinces, and more particularly in southwestern Saskatchewan and southern Alberta, the prairie surface contains many irregular but roughly circular depressions varying from two to six inches in depth and from a few feet to twenty feet or more across. These depressions are known under various names, such as "burnt-out," "blow-outs," or "sink pits." The depressions are usually bare or support a scanty growth of vegetation, while the surrounding prairie is well covered with grass. The burnt-out spots appear to be spots which from some cause or other have lost the original surface soil. The soil in a burnt-out is very thin in texture and so impervious that after water has been standing in the depressions for several days the soil below the first few inches is quite hard and dry.

Where the burnt-out spots are not extensive the best, when placed under cultivation, will produce a very fair crop in favorable seasons. Breaking by the usual method is being a difficult process, as the soil tends to slide out on striking a burnt-out spot. If the work is not very well done, crops are very uneven for the first few years after breaking. Thus on the burnt-out being thin and stunted. This fact suggests the necessity of having the normal prairie soil well mixed with that from the burnt-out. It has also been observed by residents in burnt-out areas that the burnt-out spots get smaller in the course of time. This is undoubtedly due to the encroachment of the prairie soil and favored by the drifting of soil into them from depressions from adjoining cultivated fields. A more satisfactory preparation for this type of land has been secured by the use of powerful machines. The breaking is done early and preferably with the ground moist. The soil is later well worked down and mixed by means of a heavy foot or scrubber.

The Fas Developing

As Distributing Centre

Fruit Shipments Dried From California Indicate Rapid Progress

The Fas is developing rapidly as a distributing centre for northern Manitoba, according to Paul Naffel, manager of the branch of the National Fruit Company. During the past few weeks the first direct shipments of fruit of various kinds from California over to come into the north country have been rolling into The Fas, Manitoba.

Already two carloads of peaches and lemons have been imported direct from the California Fruit Growers' Association. Formerly all goods were handled from some western Canadian jobbing centre, and shipped there. This development is news in that it is indicating the trend in the north country. It is a commercially significant development in the progress of The Fas as a distributing centre.

Is Really Illegal

The St. Thomas Times-Journal suggests that professional hitchhiking may yet be declared illegal. Much of it is already illegal. The Highway Traffic Act provides that "no person shall walk on the travelled portion of a highway, except a rider from the driver's or operator of a motor vehicle other than a public vehicle." The penalty is \$5 to \$10 for a first offence and up to as high as \$50 for repeated offences.

THE SPECTACULAR RESCUE OF THE "FLYING FAMILY"

This picture graphically illustrates the rescue of the Hutchinson "Flying Family" by the British trower, "Lord Talbot." After the "plane" "City of Richmond" had been forced down by the icy waters of Greenland. Inset Mrs. Hutchinson is shown being helped aboard the rescue craft while her children at right, are safe in the arms of rescuing sailors. At the left her husband, George Hutchinson, leader of the ill-fated expedition. Larger picture shows Mrs. Hutchinson and her children, Jane Lee and Katherine, as they survived the wreckage of their plane from a barren rock near the Eskimo village of Eker, Greenland.

Making Own Weather

Russians Find Much Can Be Done In This Respect

The Russians have decided to make their own weather. No optimistic are they that an Artificial Rain Institute has been started at Moscow, and others are to follow. Russia is largely dependent upon the crops grown on the farms, and scientists state that presently they will be able to plan out a regular scheme of fine weather and of rain occurring at just the right time. Experiments made by means of aeroplanes and powerful ground transmitting stations have shown that much can be done. In the case of bringing down rain by means of powerful high-tension currents. It has also been found possible to break up hail-storms by bombing them with great bell-mouthed cannon firing black charges. When the approach of a hailstorm is signalled by telephone the gunners are called to their stations and every effort is made to cause the hail to fall in districts where it will do the least damage. The vibrations set up by the bell-mouthed cannon frequently bring down the hail and prevent it from travelling to places where it might do damage.

May Complete Century

Electric Bell In Oxford Laboratory Has Been Ringing 25 Years

Ninety-two years ago, an electric bell made by a London instrument maker started ringing in the Clarendon laboratories at Oxford. It has never stopped, and the odds are that it will complete its century of incessant ringing. So far no repairs or replacements have been needed. It is not a loud bell, for its sound is audible only a few feet away, and it is rather an extraordinary looking contrivance. There are two ordinary rings surrounded by long bells, between which hangs a little metal ball supported by a thread. The ball taps the long bells and then swings away and taps the other. You might think that this is a perpetual motion, but it is not, for the ball is operated by batteries in the tubes above the gongs. Some days these must wear out or run down.—T.H.H.

Narrow-Minded Man Always Sees Faults

Unable To Appreciate Fine Qualities Of Humanity

It is usually the small-minded and narrow-minded man who can detect faults and failings with an eagle eye, but upon whom all the finer and greater qualities of humanity are lost. To him who ever walks with head bent and eyes on the ground the whole universe appears to be made of dust; but he who goes with head erect and eyes uplifted breathes the pure air and greets the rising sun, and forgives the dust that may be under his feet.

Sure Of Acquittal

"Four offenses is a serious one," said the judge, "and if you are convicted it will mean a long term in prison. If you cannot employ a counsel the court will appoint one for you."

The prisoner leaned toward the judge and in the most confidential manner whispered, "I have no lawyer, but I'll all right, judge, my father and landlady are on the jury."

Oil has been discovered in Duran, County Cork, Irish Free State.

Self-Pity Is Bad Habit

Those Indulging In It More Harmed Than Helped

Never complain. Let that be your leading principle. Self-pity is one of the worst habits any one can have. Unfortunately innumerable persons have this evil habit, to their own and other people's misfortune. By pitying themselves, they continually ponder on their troubles and making a display of these in order to arouse pity in others. They increase their own sufferings without end, and their own good whatever. Self-pity is sentimentalism of the most foolish kind, and is characteristic of the weakling. Just as dirt is matter in the wrong place, so is sentimentalism a feeling in the wrong place.

We are equipped with feelings that we may be activated by them to leave undone that which may be necessary, and to seek out that which will be advantageous. When we suffer pain, we should turn it to account by noting that something is going on which must be altered, and by setting to work on the instant to make the necessary change.

If, instead of doing this, we surrender to the pain, we are not true persons of feeling, but sentimentalists. There are, unfortunately, too many sentimentalists in the world, and in every one of us there is a considerable infusion of sentimentalism. Almost all of us like being commiserated, are fond of indulging in self-pity, thereby doing ourselves more harm than we imagine.—E. Tietjen.

London Banks Employ University Graduates

idea Is To Add Tone and Brag in New Class

London banks are beginning to look to young university graduates as recruits in the banking service, the idea being to have on the bank staffs young men who add tone to the staffs, and also bring in new ideas. University graduates with reputations for being "good mixers" are being taken on at one of the London banks, and thereby founding a new grade of bank official. Their prospects, it is understood, are unlimited, but success for them depends as much upon their ability to introduce new clients and to add tone to the bank as upon their actual business ability.

Not all of them can become Montagu Normans, but enterprises and what amounts to good seamanship may make them one day a "glittering prize." If not the governorship of the Bank of England.

The new scheme is the outcome of keen competition between the rival Big Four banks. Men of social standing and personality have long proved popular to these banks by introducing new clients and customers; and it is hoped that the employment of more variety men will result in valuable additions to business.

The Stormy Petrel

Charles Ships Is Bad Weather Searching For Food

The more properly a bird, the more likely it is to acquire. The brown petrel is known by at least a dozen names in various parts of the country. "Seamy-bird" being one of the most frequently met, while its characteristic, the barn owl, is often known as the charcoal. Its toes which travel on the sea. Malaga's chicken, or to give the bird its right name, the stormy petrel, will know this. This small petrel is found hundreds of miles from land, and in its search for food will storm round ships in violent storms, always keeping just above the surface of the billows, and for this reason sailors will tell you it is walking on the waves. Petrels have a large quantity of oil in their bodies, and at one time the natives of the Pacific used these birds as lamps. When they were passed through the dead bodies, and this primitive light gave a dim but certain light.

Seems Fair Division

Canada's production of creamery butter declined nearly 5 per cent in July and a total of 5,000,000 pounds in seven months, compared with last year. In July, however, the Dominion wrested second place from the Netherlands in exporting cheese to the United Kingdom, and New Zealand was a close second in supplying the British market with butter. It is a fair division of Empire trade.

"A fine little man. Do you help mother?"
"Yes, I am going to count the spoons when you have had tea."

Shanghai, China, will continue its retooling programme.

The Sleepy Car Driver

Many Serious Accidents Have Been Result Of Fatigue

When will tourists and others on the road learn that any attempt to continue driving when the limit of physical endurance is in sight is to court disaster, possibly with very serious consequences?

Fatigued by an all-night drive, a Syracuse man recently drove his car into the side of a heavily-laden truck on one of the Western Ontario highways. He and his father were killed and his mother, the remaining occupant of the car, was seriously injured. The party was on route to Michigan where the marriage of the driver was being arranged.

This accident was one of many directly traceable to fatigue on the part of the driver, who found himself incapable of exercising sound judgment when an emergency arose. Had he not tried to do the impossible, he and his father would probably be alive today.

It cannot be emphasized too strongly that the time to stop driving is when fatigue begins to creep over the individual. It is not the least of the most momentary nod on the part of a driver may be attended by serious consequences, and the only way a driver has discovered himself in the ditch, with his machine a wreck and himself injured, because he tried to continue at the wheel as the need for rest asserted itself.

For the safety of others on the road, the authorities now have had the good sense to demand of truck and bus companies that their drivers should remain only for very certain length of time. They recently suspended the license of one trucking concern which violated these regulations in a particularly flagrant manner.

If such a rule is required of truck and bus drivers, it could also be required of the private driver who all too often keeps on driving when he is physically incapable of doing so in an approved manner, and thereby founding a new grade of bank official. Their prospects, it is understood, are unlimited, but success for them depends as much upon their ability to introduce new clients and to add tone to the bank as upon their actual business ability.

Old Anchor Is Historic

Carefully Linked With Discovery Of Manitoba's Resources

Catalogued and numbered, an old anchor linked with the discovery 218 years ago of Churchill, Manitoba's northern seaport, occupies a place among historical exhibits owned by the government of Manitoba.

Unearthed with bricks and shaped like two great joined fish-bones, it passed almost unnoticed by the throngs who pass it daily to view trophies of a younger generation.

Dug out of the bed of the Churchill river during harbor excavations, the anchor once held fast the good ship "Empress," one of two ships which set sail from Copenhagen, in September, 1619, with Captain James Munck, Danish explorer.

Munck had hoped to find the "Northwest Passage" to the Far East. With 64 men he arrived at the mouth of the Churchill River and was wrecked there. Only Munck and two others were left when the next northern summer came. Scarcely and shortage of food had taken a heavy toll. The three set sail for Norway in the smaller of the two ships. The anchor was left at Churchill.

Long Voyages Of Toy Yacht

A child's toy yacht, fifteen inches long, did a lone voyage of 129 miles in the Irish Sea. It was picked up by a "Pied Piper" traveler near the Cape of Man, with the sails all set and in perfect condition. An address in Bangor, County Down, was on the sail and the ship was returned to its owner who probably valued the toy highly.

He: "There are an awful lot of girls who don't want to get married."
She: "How do you know?"
He: "I've asked them."

South Africa has a big new road programme.

"What are you doing with this bundle of wood?"
"That is not a bundle of wood—it is a catapulta. Fishing rod."—Pages Cables, Trent.

British Columbia will spend \$4,000,000 for relief, one-third each from the federal government and municipalities.

The Calgary and Edmonton branches of the Alberta Bar Association favor a voluntary debt adjustment scheme to avert a possible general moratorium.

Latest figures compiled place the number of dead in the recent Greek earthquakes at 232 and the damages at \$2,300,000. The number of injured was placed at 360.

Tracy recently became a member of the League of Nations Office, and at the same time attained sovereign independent statehood by release from its status as a mandate.

Belief that California some 50,000,000 years was the site of the North Pole was expressed by H. P. Cowden, geologist and scientist, who said his study of the state's petrified forest convinced him that in an age to come it would find itself in the tropics.

Mixed Sensations

In Parachute Jump

Leaving Plane in Big Thrill Says Pilot Instructor

Leaving an aeroplane for a parachute jump is the big thrill according to R. J. Groom, pilot instructor at Regina's airport, who has made his first jump.

"There is a moment or two of confused sensations, a display of whirling earth and sky and you feel you are being shaken up in a big bag."

"Then suddenly all is quiet, a quiet that seems supernatural. There is no racket. To one used to flying it is an eerie sensation to be up there with no wings, no engine, no wind rushing past and no apparent movement."

After landing Mr. Groom says one has a great feeling of confidence and affection for the parachute that aided the descent.

Medical Classes Overcrowded

Overflow classes in medicine and 20 to 25 per cent. increase in the number of dental students marked the opening at McGill University of both these faculties. More than 700 applications were received by the faculty of medicine, which can ordinarily admit only 100 new students each year.

A country's woman's idea of a vacation, according to the *Atlantic Globe*, is to go to her married daughter's home and put up the fruit.

The farmer will find prosperity the day his lands market.

Older Than Royal Scots

Honorable Artillery Company Dates Back Officially To 1387

The Honorable Artillery Company, which is regarded with the Queen and has a Guards adjutant and R.E.M. in a Territorial corps d'élite, though you might not have guessed it, from more outward appearances, if you had run up against them at Wipers in 1918. Though placed now only fourth on the parade order of the British Army, the H.A.C. dates back officially to Henry VIII's charter in 1537, and can quite fairly claim, through descent from London's famous trained bands, an older ancestry still. For this reason all H.A.C. bloods hold that the Royal Scots, known as Pontius Pilate's bodyguard and officially the oldest regiment in the British Army, are mere babes and military sucklings compared with themselves. Full privates pay a guinea a year for the privilege of marching with the H.A.C.

Turns To Old Profession

One Of Germany's Unemployed Is Public Story-Teller

The old profession of public story-teller, common before the spread of printing and the invention of printing, has been revived as a means of livelihood by one of Berlin's unemployed army.

Thodore Lange, known to his customers as "Uchke Edwin," sits all day in the Litzense Park and tells tales of fairies and adventures to the children that gather round him. He charges from 6 to 15 cents for each story, according to length. His repository consists of hundreds of stories.

"It was uphilled work at the start, getting a clientele," he says. "But now that the parents trust me and the children know my stories are good ones, I have more work than I can do. Often I have to go without lunch rather than disappoint the children who have waited a long time to hear their favorite tale."

Winnipeg Newspaper Union

Winnipeg Newspaper Union

(By Ruth Rogers)

"While infant mortality for the year 1931 shows an improvement of three points over the previous year, this province still has the fourth highest infant mortality rate. The general rate for the Dominion is 64.5 per 1,000 live births, while for Saskatchewan it is 69.0.

"The general death rate for Saskatchewan is lower than in 1930, the rate being 8.6 per 1,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1.

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 46.1 per 100,000 of population in 1930 to 36.0 in 1931. The rate for the Dominion is 74.0.

"The cancer death rate in Saskatchewan for the year 1931 is 63.3 per 100,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1.

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 46.1 per 100,000 of population in 1930 to 36.0 in 1931. The rate for the Dominion is 74.0.

BRITISH FILMS

Though there are Australian, South African and other Dominion players in British film studios, Barry Jones and Maurice Colbourne seem, with the exception of Raymond Massey, to be the nearest thing to Canadian representation. Their arrangements with producers call for time out for at least one trip to Canada each year. They are shown here with Anna Grey, during the filming of the first full length Shaw picture, "Arms and the Man" which was largely directed by G. B. S. himself.

Vital Statistics

Saskatchewan Had Lowest Mortality In 1931

The preliminary annual report of the Dominion Bureau of Statistics for the year 1931 has now been compiled and has come to hand. Commenting upon the information contained therein regarding the Province of Saskatchewan, Honourable F. D. Munro, M.D., Minister of Public Health, stated as follows:

"The outstanding feature contained in the preliminary vital statistics report just issued by the Dominion Bureau of Statistics for the year 1931, insofar as this province is concerned, is that Saskatchewan, for the first time in its history, leads all Canada in lowest maternal mortality, the rate being 4.4 per 1,000 live births, as compared with 5.0 for the whole Dominion. In view of the fact that for many years Saskatchewan had the highest mortality rate in this regard in the Dominion, and taking into consideration also the general economic situation existing throughout the province, as well as the adverse conditions in the drought areas, this achievement is significant.

"In Saskatchewan in 1931 there were 93 maternal deaths. Of this number 90 occurred in hospitals. Of the 23 deaths which took place outside of hospitals, 21 were attended by physicians, so that only 2 out of 93 cases were without medical attention.

"While infant mortality for the year 1931 shows an improvement of three points over the previous year, this province still has the fourth highest infant mortality rate. The general rate for the Dominion is 64.5 per 1,000 live births, while for Saskatchewan it is 69.0.

"The general death rate for Saskatchewan is lower than in 1930, the rate being 8.6 per 1,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1.

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 46.1 per 100,000 of population in 1930 to 36.0 in 1931. The rate for the Dominion is 74.0.

"The cancer death rate in Saskatchewan for the year 1931 is 63.3 per 100,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1.

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 46.1 per 100,000 of population in 1930 to 36.0 in 1931. The rate for the Dominion is 74.0.

In the Public Interest

Bonding Lawyers Handling Trust Funds Recommended By Labor Congress

One of the resolutions adopted by the Trades and Labor Congress of Canada, sponsored by a local union, recommends the imposition of a blanket bond on all lawyers and notaries handling trust funds. This is a matter which is of vital concern, not only to labor, but to all classes in the community. It is not necessary to refer to notorious breaches of trust perpetrated by people who had gained the full confidence of their clients. Such instances are, fortunately, known to all, if not from bitter personal experience, at least from reports in the press. The legal profession is an honorable one, but there are black sheep in every fold, and it is no reflection upon the honest to guard against the consequences of dishonest practices. The public interest comes first. Employers are careful to bond their employees placed in positions of financial responsibility; when the public employs an agent for financial transactions, the relationship is much the same. It is small comfort to an aggrieved party that the wrong-doer, if caught, will be made to suffer the pangs of the law. What the public wants is indemnification for loss. There is nothing humiliating in the principle, which is a businesslike way of dealing with a strictly business proposition—liability insurance.

Not Altogether Idle

Unemployed Young Man in Toronto Has Learned To Knit

Unemployment has caused people to turn to many things, but the best we have heard so far concerns a young man of the west end who visits his young lady in the east end and knits. He only has work on Saturdays, and therefore no spare cash for the movies, etc.

His young lady friend is very industrious, and had been knitting before a sweater for the winter. He soon caught onto the knack of handling the long needles, and now they sit and talk with two sweaters under way at the same time.—Toronto Telegram.

Recipes For This Week

(By Betty Barclay)

RECIPIENTS

1/2 cup special cake flour, sifted.

1/4 teaspoon baking powder.

1/4 cup butter or other shortening.

2 squares unsweetened chocolate, melted.

1 cup sugar.

2 eggs, well beaten.

1 teaspoon vanilla.

1/2 cup walnut meats, chopped.

One-fourth ounce measure, baking powder, and sift again. Add butter to chocolate and blend. Combine sugar and eggs; add chocolate mixture, beating thoroughly, then add vanilla and nuts. Pour into two greased pans, 8 x 8 x 2 inches, and bake in moderate oven (350 degrees Fahrenheit) 35 minutes. Cut in squares before removing from pan. Makes 20 brownies.

PEANUT-BUTTER CUTLETS

1 1/2 cup peanut-butter.

1 cup hot milk.

1 teaspoon salt.

6 half-inch slices of bread.

Pepper.

Mix peanut-butter with hot milk and seasoning, mixing thoroughly. Dip slices of bread into the peanut-butter mixture. Soak in hot milk.

Soak with pickles and olives.

A tennis racket a half century old is still used in tournaments in London, England. The racket, now owned by J. L. Strachan, has never been restrung.

A Russian factory near Leningrad is to produce typewriters in large quantities.

Demand for "cheaper" footwear is lowering the quality of Germany's output.

One of nature's oddities is the Volvox, a minute fresh-water organism that is both plant and animal.

U.S. State Department Issues Useful Pamphlet

Contains Location and Proper Spelling Of Foreign Places

A pamphlet designed to teach Americans how to spell the names of foreign cities and countries correctly has been issued by the state department.

Compiled by the United States Geographic Board, the report gives the proper spellings, location and brief additional information relating to nearly 2,500 of the more important names of foreign countries, cities, provinces, rivers and other natural features.

It states the proper way to spell Tokyo is Tokyo and not Tokio, that Yugoslavia, not Jugoslavia, is the correct English spelling of the name of that Balkan country, and that the word Capetown should be joined together and not spelled Cape Town.

OVER 10 MILLION JARS USED YEARLY

You can cook 3 vegetables AT ONCE

in the same saucepan by using

GANAPAR

Do such vegetable up in its own bag of Ganapar Cookery Parchment.

There's no fat and no salt, not even from salted meat. It's the best value and flavor will be retained. And you use only one minute turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fatty odor in the kitchen. No asparagus or lettuce to clean up. When roasting meat, line your pan with Ganapar. Fat and juices won't burn. No taste or odor remaining of the pan afterward.

You can use Ganapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't absorb dirt. Made by the makers of one famous PARASANI Heavy Waxed Paper in the Green Box.

Most grocers, druggists and department stores have Ganapar on sale. If you haven't, write to Ganapar, Inc., 125 West 42nd Street, New York 36, N.Y., and we'll send you a free sample and booklet too. Made by the makers of one famous PARASANI Heavy Waxed Paper in the Green Box.

Special Offer! Enclosed find 25c for which please send me one full size package of Ganapar Cookery Parchment and your

GOVERNMENT OF THE DOMINION OF CANADA

4% LOAN—1932

The Minister of Finance offers for public subscription

\$80,000,000

Dominion of Canada 4% Bonds

Bearing interest from 15th October, 1932, and offered in two maturities, as follows:

\$25,000,000—3 YEAR 4% BONDS, DUE 15th OCTOBER, 1935

\$55,000,000—20 YEAR 4% BONDS, DUE 15th OCTOBER, 1952

Subject to redemption at par and interest on or after 15th October, 1947

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations:

3 YEAR BONDS, \$1,000

20 YEAR BONDS, \$500 AND \$1,000

The proceeds of this Loan will be used to retire \$34,449,950 of bonds maturing 1st November, 1932, and to provide for the general purposes of the Government and the Canadian National Railways.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are chargeable on the Consolidated Revenue Fund of Canada.

The amount of this issue is \$80,000,000. The Minister of Finance, however, reserves the right to allot or reject the whole or any part of subscriptions received, provided such allotments do not increase the principal amount of the issue by more than \$25,000,000.

Applications will not be valid on forms other than those printed by the King's Printer.

ISSUE PRICE: 3 Year Bonds, 99.20 and interest, yielding to maturity 4.28%
20 Year Bonds, 93.45 and interest, yielding to maturity 4.50%

Payment is to be made in full at time of application or in the case of the 3-year bonds, on allotment.

Subscription lists will open on 31st October, 1932, and will close on or before 16th November, 1932, with or without notice, at the discretion of the Minister of Finance. Subscriptions will be received by any branch in Canada of any chartered bank and by recognized dealers from whom official application forms may be obtained.

DEPARTMENT OF FINANCE,
Ottawa, 31st October, 1932
